#### DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

### Claim Rejections - 35 USC § 103

Claims 1-3, 5-7, 9-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mani in view of Scheder, U.S. Patent 3,595,766.

The reference does not disclose addition of a buffer and regeneration of said buffer continuously and external to said electrodialysis stack.

The Scheder patent is cited to show the use of buffers to control the pH in an electrodialysis method, wherein said buffer is regenerated continuously and external to the electrodialysis stack (see figure 1 and abstract).

Consequently, the invention as a whole would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the disclosure of the Mani patent with the teachings of the Scheder patent, because the Scheder patent teaches that buffers to control and maintain the pH within one pH unit (see example 2 in col. 4).

## Response to Arguments

Applicant's arguments with respect to claims have been considered but are most in view of the new ground(s) of rejection.

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arun S. Phasge whose telephone number is (571) 272-1345. The examiner can normally be reached on MONDAY-THURSDAY, 7:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nam X. Nguyen can be reached on (571) 272-1342. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
